

CrossPoint Church

CrossPoint Church looked to Nuvera to help meet the technology needs of their growing faith community.

CrossPoint Church's Challenge

Everything CrossPoint Church does is organized under four values; Gather, Grow, Give and Go. They are gathering a community to help grow their faith. They are also giving back and going out to share the gospel.

CrossPoint Church needed to find a way to better serve its growing community of parishioners. This forward-thinking congregation knows they are better able to give the word of the Lord with the help of technology. Their goal was to replace outdated equipment that wasn't serving them well and add better Internet and cloud solutions.

Why They Chose Nuvera

While growing their faith community in the city of Hutchinson, CrossPoint Church has congregants who work for Nuvera, the local communications company, so they were aware of the products and Information Technology (IT) expertise that could be offered.

CrossPoint had a free consultation and technology assessment with the Nuvera sales and IT teams. This helped them map out a comprehensive plan to stay on track with ever-changing technology. Nuvera helped evaluate and match the needs of the budget.

CrossPoint Church believes in growing stronger faith through relationships, and the attentiveness of the Nuvera staff was appreciated and well-received. They decided to support local business and ended up choosing Nuvera for their IT needs.

How The Product Has Helped and Their Experience With Nuvera

Nuvera was able to hook CrossPoint Church up with its hosted voice solution, FlexVoice, which gave them a host of phone features with a small up-front cost. This

About CrossPoint Church

Industry: Religion

Location: Hutchinson, MN

Nuvera Solution: Fiber Internet, Managed Wi-Fi, Cloud Hosted Server and FlexVoice

Website: cphutch.church

feature-rich phone system is simple to use, affordable and has crystal-clear HD-voice. The set-up, training and maintenance were provided by the knowledgeable Nuvera team.

CrossPoint Church now has super fast and reliable fiber Internet speeds, and they also had Nuvera set up a Managed Wi-Fi connection. Managed Wi-Fi allows CrossPoint separate access for church staff and congregants. This solutions helps to provide enough Wi-Fi throughout the church and has added protection and security features for the network.

“We needed to replace outdated equipment and introduce new technology like VoIP voice solutions, adding fiber with managed Wi-Fi, and a cloud hosted server. These products help us to be agile and more connected.”

**– Loretta Christensen, Office Manager/
Communications**

The whole experience from set-up to maintenance has been exceptional. Nuvera helped CrossPoint Church add technology that would benefit both staff and parishioners. They are now more connected than ever, and they know they can always count on the expertise of the local Nuvera team. Overall, they have experienced uninterrupted service since upgrading their outdated equipment and technology.
