

Nuvera helped School of St. Philip navigate the Federal e-Rate Program to expand their learning technologies.

School of St. Philip's Challenge

As a Pre-Kindergarten through Grade 5 School, St. Philip's is instrumental in guiding its students toward academic excellence. Unfortunately, they didn't have the resources to improve their technology until they consulted with Nuvera about the e-Rate Program for schools and libraries. Nuvera helped guide St. Philip's through the e-Rate Program, which is used to make telecommunications and information services more affordable through funding from the Universal Service Fund. Their goals as a school were to expand their digital learning technologies to connect students to increased Wi-Fi speeds and allow easier access to the web with updated computer labs and devices.

Why They Chose Nuvera

The School of St. Philip appreciates local, economical, and service-minded companies like Nuvera who support others in the community. They knew that Nuvera's technical expertise and local service team would bring knowledgeable experience and local service to what they were looking for, and would deliver on the promises they made.

Not only did Nuvera inform St. Philip's of the e-Rate Program, but they helped them through the process, informed them of the technology that would fit the vision of the school, and proposed ideas that would be most beneficial to the students and staff.

St. Philip's had a great rapport with the staff of Nuvera, as they were helpful with not only the sales and recommendations, but also with honest and open communication, answering questions in a timely manner, performing the installation, and following up with the school after installation for training and support.

About School of St. Philip

Industry: Education

Location: Litchfield, MN

Nuvera Solution: e-Rate Funding

Website: shepherdofsouls.org/school

How The Product Has Helped and Their Experience With Nuvera

Nuvera's recommendations increased School of St. Philip's efficiency with a faster and more reliable Wi-Fi signal and gave each student the ability to learn from technology tools. The solutions, along with the help of the e-Rate Program, saved St. Philip's a significant amount of money and issues, and are helping the students work together, facilitate learning, and develop necessary skills.

Now, St. Philip's is able to get more students working on one-to-one devices in every classroom, whether that be iPads or laptops. Their Internet speeds are faster than ever, and the Wi-Fi access allows a connection throughout the entire school.

To take advantage of the e-Rate Program funding, each school must identify their needs and submit a request. Discounts can range from 20 to 90 percent for eligible schools. The staff at Nuvera is trained in this program, and can help navigate the process while providing the solutions to the school's needs.

Nuvera helped the School of St. Philip guide students toward academic excellence and provide a strong education through advanced technical solutions utilizing the e-Rate program.

"Nuvera took the time to come in and work through our questions and develop a solution to improve the efficiency of our system."

- Michelle Kramer, Principal
