## Nuvera Gig Cities Fiber Construction

Nuvera's Gig Cities construction is making significant progress this summer. Crews can be seen in dozens of neighborhoods across our service areas, making the best of the good weather and bringing fiber internet to as many customers as possible.

We are working to establish fast, reliable fiber connections that are well-equipped to meet the demands of the future. The majority of Nuvera's customers are choosing the fastest speeds available, underscoring the critical need for fiber connections in every household and business. Investments like the \$200 million Nuvera is putting into fiber internet expansion are every bit as important as roads, bridges and other infrastructure projects to help support each community's success.

As crews are working hard with mainline construction, splicing and connections to individual homes and businesses, there are several things to know about the construction and restoration process on your property:

- Before construction begins, Nuvera will mark right-of-way areas where work is occurring with flags or paint. This indicates where fiber lines will be placed. All flags will be removed once work is complete.
- Customers are responsible for marking any private facilities in their yard, such as sprinkler systems, invisible fencing, private power, etc.
- Restoration will happen in two phases and may take several weeks to complete:
  - o Phase one: Ensure the construction area is safe, by filling holes with sand. This allows time for settling before final restoration.
  - o Phase two: Work crews return and complete the site restoration after construction is complete. The final restoration includes filling the impacted areas with black dirt/topsoil and grass seed. If a hard surface has been disrupted, it will also be replaced with a hard surface.

If you have questions or concerns about the construction in your yard or neighborhood, call 844.354.4111 or email [responseteam@nuvera.net](mailto:responseteam@nuvera.net)

Current Nuvera customers will migrate to the new fiber network and will be contacted directly when it's time to switch over.

Learn more about the construction process at [nuvera.net/construction](http://nuvera.net/construction). If you have concerns about the restoration process at your location, you can submit a ticket directly to Nuvera by scanning this QR code with your phone, which will take you to an online form.

# Home Wi-Fi with Nuvera IQ Helps Parents Set Boundaries

Back to school is here already and kids may need some help refocusing on school priorities after a summer of loose screentime restrictions. Helping your child regain their focus is critical for their school year success.

One way to create this balance is to implement Nuvera's Home Wi-Fi with the easy-to-use Nuvera IQ app. The Home Wi-Fi controls enable parents to:

- Schedule offline time, ensuring your kids will not have access 24/7 to the internet.
- Filter apps, content and websites that you deem unsafe for your kids.
- Set profiles for each user and view usage for each profile, such as time spent online and specific applications or websites visited.

Not only does this give parents peace of mind, but also allows children to explore the internet in a secure manner.

One of our two Home Wi-Fi plans is sure to be the right fit for your household needs. With prices starting at just \$6.95 a month, accessing this service is both cost effective and convenient. Home Wi-Fi is also included in certain internet packages. The setup process is as simple as it gets, requiring only a modem connected to a wireless router or a wireless gateway.

Learn more about Home Wi-Fi with Nuvera IQ by going to [nuvera.net/home-wifi](http://nuvera.net/home-wifi), calling 844.354.4111 or stopping by your local Nuvera office.

## Save Big on Wireless!

Get Nuvera Wireless for as low as \$30/line\* when you're a Nuvera internet customer.

**Call 844.354.4111**  
or stop by your local  
**Nuvera office to learn more!**

Service subject to availability. Some restrictions may apply. \*Only for Nuvera broadband customers. Includes unlimited talk and text plus 20 GB of data \$45 for a single line; \$30 each for two or more lines. Data will throttle to 256 kbps after 20 GB of usage. Hotspot usage will throttle to 600 kbps after 5 GBs. The customer must choose a minimum of 30-month device financing or buy the device outright. This promotion cannot be used if the customer has received a promotion within the past 12 months. Each line is limited to one type of eligible promotion.

## Nuvera in the Community!

The Nuvera team had a great time seeing so many friends and customers at parades all across our service areas this summer! Here are just a few photos from our parade participation.

Hutchinson Jaycee Water Carnival, June 18

Springfield Riverside Days, June 23

Litchfield Watercade, July 8

New Ulm Bavarian Blast, July 23

Nuvera employees raised more than \$900 and gathered food items that were all donated to food shelf organizations in our service areas. Picture is Nuvera employee Candice Rogers (left) with volunteers at the McLeod Emergency Food Shelf in Hutchinson.
