Nuverera Gig Cities Project Makes Huge Strides in 2022

Nuverera had a remarkable construction season this year, with projects in many communities still ongoing until winter officially sets in. In 2022, fiber internet projects were started in: New Ulm, Hutchinson, Glencoe, Elko New Market, Goodhue, Mazeppa, Prior Lake, Sleepy Eye, Springfield, Webster, Litchfield and Aurelia. Customers should check NuveraGigCities.com to learn more about our construction areas. In 2023, work in many of these communities will continue with additional construction projects also beginning in new areas.

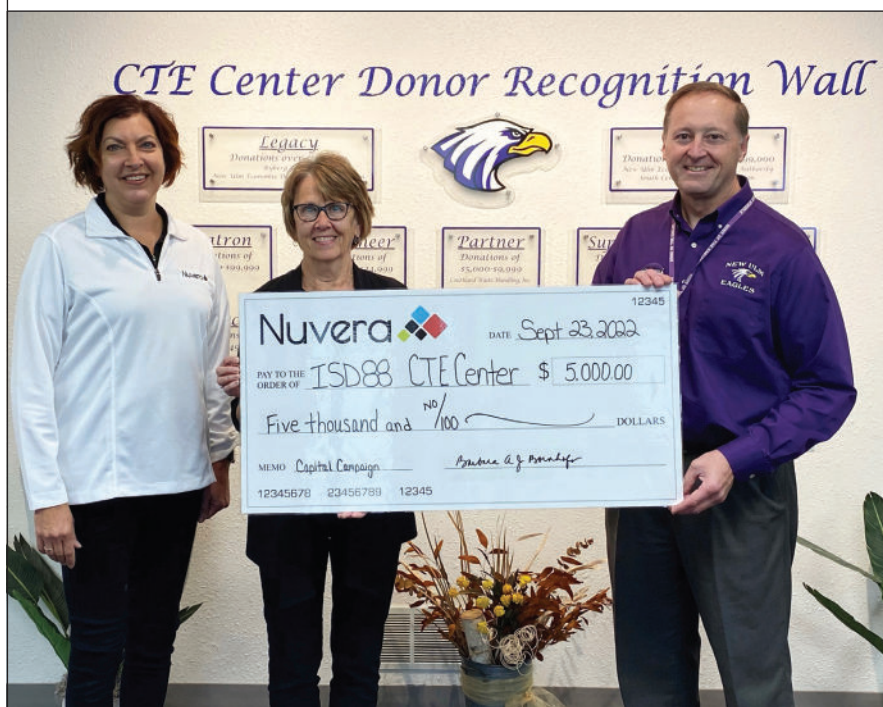

With Nuvera Gig Cities project being announced late in 2021, 2022 became a transformational year as Nuvera invested significant capital funds and staff time to this future-focused initiative.

Fiber internet brings many benefits to our customers, including:

- Speeds up to a Gig that won't slow you down, even with multiple users
- Identical upload and download speeds

- Unlimited data for you to stream, chat and game

You can find out more about Nuvera Gig-speed internet and check availability by visiting NuveraGigCities.com or calling 844.354.4111. ♦

Nuverera and CoBank recently made a donation to the Career Technical Education (CTE) Center that is part of ISD 88 in New Ulm. The CTE is a public-private partnership with the goal of giving students career exposure to the skilled trades in the New Ulm area. Nuvera's donation was matched by CoBank through its Sharing Success program. Pictured are (l-r) Kathy Lund, Nuvera Senior Director of Regulatory and Customer Operations; Barb Bornhoft, Nuvera Chief Operations Officer/ Vice President; and ISD 88 Superintendent Jeff Bertrang.

How Do Home Wi-Fi and Mesh Extenders Work Together?

Nuvera's Home Wi-Fi replaces a wired connection with wireless radio signals, thereby reaching all the connected devices in your home. You can browse the internet with a superior connection and reduced buffering using our Home Wi-Fi.

However, some homes—especially larger ones or those with many physical barriers—have “dead spots” where the wireless signal doesn't seem to reach. That's where a mesh extender can greatly improve your surfing, streaming, and gaming experience.

A mesh extender is a type of wireless repeater used to expand the reach of the Wi-Fi signal. The extender connects wirelessly to the Wi-Fi access point, picks up the signal and retransmits it.

Nuvera's Home Wi-Fi helps you manage and maintain your home network. Parental controls include limiting access to TikTok or other social media and setting restrictions on hours

that your kids can use the internet. Other great features with Home Wi-Fi are the ability to set up a guest network, view devices connected to your network and their network usage and run a speed test.

Our Home Wi-Fi Premium includes everything in the Home Wi-Fi package plus advanced parental controls, network security, and activity and device priority, a great benefit for those who work from home.

Add our Wi-Fi Mesh Extender for less than the price of a latte per month and improve your Wi-Fi range throughout your entire home, eliminating any concerns of being able to connect to the internet where you want to.

Go to nuvera.net/home-wifi or call 844.354.4111 to learn more. ♦

Nuvera's Adopt-A-Highway crew helped keep Minnesota beautiful, cleaning up our stretch of Hwy 15 near New Ulm in mid-October.

Nuvera.net is New and Improved!

Nuvera is excited to launch a new, innovative website with immersive, customer-friendly features at nuvera.net.

For years, Nuvera customers have relied on our website for updates, service listings and account information. Those same components are enhanced on the new website with streamlined navigation to help website visitors find information. We are also pleased to offer several new features on the updated site.

A key offering on the updated website is an improved shopping experience. Visitors can use an interactive map to determine what services are available at their address and purchase those services right on the site via a secure virtual shopping cart.

Nuvera's Gig Cities project is also featured on the new website, with FAQs, instructional information about the fiber project process and more. Visitors can access the Gig Cities information either from the main landing page or by going directly to NuveraGigCities.com.

The fresh website design has been optimized to improve the experience for those looking at the site on their mobile device. Community pages feature services available in each town or municipality so it's easier for visitors to find what is relevant to them.

In 2023, Nuvera will perform similar improvements to our business website, nuverabusiness.com. ♦

Nuvera recently held a pet contest internally to raise money for local animal shelters. Employees could pay to cast their votes for their favorite pets and these are our winners in three categories: Hank (dog), Chester (cat) and Hotshot (other).

If you are interested in purchasing Nuvera Communications, Inc. stock (NUVR), please contact our corporate office.
