

# How to enable SSL/TLS in Magic Mail

SSL/TLS will soon be required for all Nuvera email. You'll want to make sure to have it enabled to prevent email disruption.

For this setting to work, it needs to be enabled both in your mail program as well as in Magic Mail.

For instructions on how to adjust settings in your mail program (Outlook, Android, iOS, etc), visit our website here: <https://nuvera.net/support/email-setup-instructions/>

The Magic Mail login page can be found here: <https://mail.nuveramail.net/login.php>

1. Enter your full email address and password to sign in.

2. Click on “Security Options” on the left hand side of your screen.

The screenshot shows the MagicMail dashboard interface. At the top left is the MagicMail logo with the tagline "Protecting Your Email". At the top right is the Nuvera logo and a "Logout" button. Below the logo is a navigation menu with items: Home, Webmail, Spam Management, My Email Options, Security Options (highlighted with a red box), Manage Mailboxes, and Logout. Below the menu are "Anti-Spam / Anti-Virus" status indicators, both showing "Enabled".

3. Under the “Manage Security Policies” heading, click the bubble for “Enabled” next to “Enforce Secure Channels (SSL/TLS) For All Services”

The screenshot shows the "Security and Authentication Settings" page. The page title is "Security and Authentication Settings" with a subtitle "Use this section to update your authentication settings". There are two main sections: "Change Password" and "Manage Security Policies". The "Change Password" section has input fields for "Current Password", "New Password", and "Confirm Password", with a "min 12 chars" requirement and an "Update Password" button. The "Manage Security Policies" section has three rows of settings: "Enforce Secure Channels (SSL/TLS) For All Services" (Enabled radio button selected, Disabled radio button unselected), "Restrict SMTP Authentication To Ports 587 and 465 Only" (Enabled radio button selected, Disabled radio button unselected), and "Legacy Mailbox Access (POP3)" (set to "Plain Text (Unsafe)"). The "Update Policies" button is highlighted with a red box.

4. Before you logout, click “Update Policies” to apply the change. Logout and be sure to update the settings in your mail program. Use the link at the top of the page for more instructions.
