

City of Glencoe

The City of Glencoe's motto is "Small City—Big Future." Glencoe's city leaders know that a burgeoning community needs certain pillars to support the innovations of their businesses and quality of life desired by their residents.

That's why they were thrilled that Nuvera completed the bulk of the fiber construction project—more than 2,700 passings—within the city limits of Glencoe in 2023. By all indications, the residents and business owners are also thrilled to have fiber available in their town: in 2023, Nuvera grew 13% in connections in Glencoe to achieve a remarkable 55% market share.

"We've worked with Nuvera for nearly 10 years. They've been our managed IT provider for the City of Glencoe, for all the city buildings," said Glencoe City Administrator Mark Larson. "We were a little ahead of the fiber curve in that we had fiber put in all our city buildings a few years ago. We immediately noticed the improvement in speed and reliability."

"Newly installed fiber internet has been received well by residents across the city," Larson said, adding that the city features Nuvera's fiber internet as an important benefit to businesses considering relocation to their city.
