Building Stronger Connections with Our Communities

At Nuvera, we've heard from so many customers who love their Nuvera fiber internet—and we couldn't be more thrilled! High-speed, reliable internet isn't just about staying connected; it's about empowering communities, enabling local businesses to thrive, and helping families stay close to what matters most.

Since the launch of our Gig Cities Fiber project three years ago, we've been committed to bringing cutting-edge fiber technology to southern Minnesota. With over 30 fiber projects completed in 2024, and connections extended to 21 communities—including new Nuvera towns of Belle Plaine, Cokato, Olivia, and Shakopee—we're helping make fiber internet a reality for more

households and businesses.

Reliable high-speed internet supports working from home, online learning, telehealth services, and so much more. It's a game-changer for communities, and we're proud to bring that transformation to you.

Looking ahead to 2025, Nuvera is committed to further expanding its fiber internet initiatives to meet the growing needs of our communities. As soon as the ground thaws, Nuvera and its contractors will break ground on multiple fiber internet projects across our service areas.

Keeping Kids Safer Online with Bark

More than ever before, cyberbullying, inappropriate content and other digital risks are part of the daily issues that parents must navigate to try to keep their children safe. Nearly half of U.S. teens ages 13 to 17 (46%) report ever experiencing at least one of six cyberbullying behaviors asked about in a Pew Research Center survey conducted in 2022. According to the National Institutes of Health, adolescents who experience cyberbullying are more than four times as likely to report thoughts of suicide and attempts as those who didn't.

The Bark app from Nuvera is a comprehensive parental tool designed to help parents make their children's safety a top priority.

Why Choose Bark?

- **Content Monitoring:** Tracks texts, emails, and social media across 30+ platforms for key words to spot potential issues like bullying or exposure to harmful content.
- **Instant Alerts:** Receive real-time alerts for dangers, enabling quick intervention when needed.

- **Location Tracking:** Get notified when your child arrives at or leaves designated locations.
- **Privacy Protected:** State-of-the-art encryption ensures your family's data is secure.

With tools like Bark, you can take proactive steps to protect your child's online experiences while fostering positive digital habits.

Quick Fixes for Common Internet Issues

Struggling with slow internet or dropped connections? Here's a quick guide to troubleshoot your network issues and get back online in no time.

1. Check Your Internet Speed

Use Speedtest.net to compare your network's speed against your service plan. Ensure no heavy downloads or streaming are occurring during the test for accurate results.

2. Restart Your Equipment

Turn off your modem and router, unplug them for 60 seconds, and power them back on. This simple reset often works wonders.

3. Inspect Your Cables

Check for loose or damaged cables connecting your router or modem. Replacing worn-out cables can save you hours of troubleshooting.

4. Minimize Wi-Fi Interference

Keep your router central and away from walls, microwaves, and other electronics that can weaken signals.

5. Expand Coverage

Have dead zones? Add Wi-Fi extenders or upgrade to a mesh system for seamless connectivity.

6. Troubleshoot Devices

If one device isn't connecting, restart it and double-check its Wi-Fi settings.

Managing bandwidth is also crucial—limit usage for non-essential devices to optimize performance during high-demand periods.

Still having issues? Visit [nuvera.net/support](https://www.nuvera.net/support) for answers to commonly asked questions or contact Nuvera support at 844.354.4111.
