

Town & Country Tire Chose Managed WiFi for Better Internet Security, Functionality, and 24/7 Monitoring by Nuvera

Town & Country Tire's Challenge

Town & Country Tire is a locally owned and operated auto repair and tire service center located in Hutchinson since 1984. They are a very loyal team that is dedicated to giving their customer the very best auto repair service, with upfront and honest quotes. They have a passion for their products and giving customers the best auto experience, which is what gave them the conviction to turn hard work and inspiration into a booming tire and service center built on trust. Their philosophy is quite simple: Never promise more than we can deliver, and always give the customer more than they expect.

“We chose Nuvera to help us with our network problems because they have done a great job for us in past experiences, and they have a trustworthy and loyal team.”

– Bob Elliott, Owner/Operator

Why they chose Nuvera

Town & Country Tire has had great past experiences with Nuvera and are confident in the abilities and expertise of the technical team. Because of the service that Nuvera has provided in other situations, they were more than willing to listen to the recommendations offered to them by Sales Consultant, Brian Stark. After a free consultation to discuss different options, Town & Country Tire decided to take Nuvera's advice and install a new Cisco Meraki MX64W Router with Firewall, powered by Managed WiFi.

About Town & Country Tire

Industry: Auto Repair & Tire Services

Location: Hutchinson, MN

Nuvera Solution: Managed WiFi

Website: <http://www.townandcountrytire.net/>

How the product and services have helped

Managed WiFi allows Nuvera to manage and monitor for intrusion detection while preventing Internet traffic to known malicious sites. Prior to the new router installation, Town & Country Tire would give out their WiFi password to customers who requested to use their WiFi, which was not the safest environment, and left their important documents and data open to threats on a day-to-day basis. Now, their customers are able to access the WiFi at their convenience, and Town & Country Tire's business and customer data is being protected with a separate password.

There was no upfront capital or licensing costs and Town & Country's WiFi is now conveniently billed each month on their Nuvera invoice. They know they are being provided not only the protection against malicious threats, but they have a team of technical experts at their disposal in Nuvera.

Their experience with Nuvera

Town & Country Tire has not only been pleased with the service provided to them by Nuvera's helpful team, but they are impressed with the new technology. They know it was the perfect recommendation for them, as they are now protected with separate private and customer networks. They are getting extra protective features, 24/7 monitoring by Nuvera's team, and they have not needed to reboot their systems since the switch. The Meraki router also allowed them to cut down on extra equipment, as before they needed two different routers to power their systems, and now only need one. It has been a great and trusting partnership between the two local businesses, that looks to continue long-term.
